EXPERIENCE

2013 - 2014 UX Designer *Glencoe Software*

Installed analytics (GA, Mixpanel, Gauges) to key sites. Currently working on some [cool projects](#).

2012 - 2013 UX Designer *Kareo*

Built out a system for faster prototyping using Angular JS and jQuery. Also, I did [design explorations](#) throughout the year as to how our core product would interact and feel if it's completely reimaged.

2009 - 2012 Senior Interaction Designer *iParadigms*

Redesigned the [core product](#) from the ground up, making it more modern and intuitive. I also helped bring our product onto the [iPad](#). In both projects, communication was key, as virtually all depts. within the company had some part in it. In addition, I also helped guide the other designers on my team, pushing them to reach a new level.

2007 - 2009 Interaction Designer *Convio*

Delivered detailed hi-fi mockups; also communicated to different members in the team about what UI decisions were made and the reasons behind them.

2005 - 2007 UI Engineer *GetActive*

Abstracted most of my projects back into the main code branch, allowing other front-end developers to use and reuse design patterns while making it more user-friendly to our clients.

EDUCATION

2007 - 2008 MFA Visual Effects (degree on hold)
Academy of Art University

2001 - 2005 BS Computer Science & Elec. Engineering
University of California, Berkeley

PROJECTS

Websites

[Gracepoint](#)

Designed from scratch. One config file to rule them all.

[acts2fellowship](#)

Barely more than a year old, this Wordpress theme is now being used by 8 different campus groups across 6 cities.

Apps / Frameworks

[User Experience Spec Engine](#)

Utilizes dropbox to make life easier for contributors (internal and external).

[Google Calendar \(for PHP\)](#)

Framework to easily bring data from Google Calendar into PHP.
