EXPERIENCE

2012 - 2013 **UX Designer**
Kareo

In the process of building out a system for faster prototyping (using Angular JS). Worked on re-imagining the entire workflow — interaction and visuals — of the core product.

2009 - 2012 **Senior Interaction Designer**
iParadigms

I redesigned the core product from the ground up, making it more modern and intuitive. I also experienced bringing our product onto the iPad. In both projects, communication was key, as virtually all depts. within the company had some part in it. In addition, I also helped guide the other designers on my team, pushing them to reach a new level.

2007 - 2009 **Interaction Designer**
Convio

Delivered detailed hi-fi mockups; also communicated to different members in the team about what UI decisions were made and the reasons behind them.

2005 - 2007 **UI Engineer**
GetActive

In the process of making our application more usable to our clients, I've abstracted most of my projects back into the main code branch, allowing other front-end developers to use and reuse design patterns.

EDUCATION

2007 - 2008 **MFA Visual Effects** (degree on hold)
Academy of Art University

2001 - 2005 **BS Computer Science & Elec. Engineering**
University of California, Berkeley

PROJECTS

Websites
Gracepoint
Designed from scratch. One config file to rule them all.

acts2fellowship Magazine
Only a year old, this Wordpress theme is now being used by 7 different campus groups across 5 cities.

Apps / Frameworks
User Experience Spec Engine
Utilizes dropbox to make life easier for contributors (internal and external).

Google Calendar (for PHP)
Framework to easily bring data from Google Calendar into PHP.

Memorization app
Once loaded, it can still run offline.

SKILLS

Applications
Photoshop, Illustrator, xScope, Slicy, Premiere, After Effects, iBooks Author, Final Cut Pro

Repositories
Git (Github),
SVN (Google Code), CVS

Languages
HTML5, CSS3, Javascript, Ruby, PHP

Frameworks
LESS/Sass, Twitter Bootstrap, 960 Grid System, Angular JS, jQuery, Mootools, Ruby on Rails
